Everything in Steel - On Time - On Budget

ABOUT US

Simmonds Group specialises in everything in steel, providing all your engineering and installation requirements in maintenance and construction.

With the backing of 3 workshops all based in Perth, this allows us to fabricate & install all items in steel on site, on time, on budget.

Combining our laser cutting, fabrication and paint workshops Simmonds Group specialises in design, fabrication of small and large site & workshop components as we can control every job from start to finish with exceptional lead times.

CUTTING EDGE EQUIPMENT

Simmonds Group site equipment & factory machinery is a step above the rest, combining laser cutting 2D & 3D machinery, plate rollers, presses, welders, access equipment, mine site light & heavy vehicles, lifting equipment, in-house 3D drafting & modelling software which allows us to fabricate, construct, and install to all your requirements.

PARTNERING & PERFORMANCE

Our can-do approach to our client's projects has allowed us to build many long term relationships throughout our 18 years of development.

Either self-managing or partnering with others, Simmonds Group always strives to achieve service, commitment, and reliability throughout our high standard of work for our clients within the mining and construction industries.

OUR TEAM

Safety for our staff, clients, colleagues, and contractors is our No. 1 priority. Our current team of 40 staff allows us to provide excellent service to a wide range of industries.

From project managers to apprentices, our multi-cultural workplace environment brings a vast range of experience throughout the many industries including mining, industrial, architectural, and agricultural.
